

A Modern Tax Agency

MyTaxes is one of several innovative advancements the West Virginia State Tax Department is undertaking to become a modern tax agency.

The State Tax Department's \$22 million improvements include a new computer system. The technological advancements are scheduled to be complete in 2009.

MyTaxes

Now Online 24/7

<https://mytaxes.wvtax.gov>

A new innovative modern tax agency tool is now at your finger tips.

MyTaxes

gives West Virginia business Taxpayers, Certified Public Accountants and Tax Preparers the ability to view their accounts, make changes to their accounts, and file and pay their taxes through the secure website. The 24/7 access to tax accounts and the State Tax Department makes tax compliancy easy, quick and simple.

Whether you have one account or several to manage, *MyTaxes* can help Taxpayers keep track of their filing and payment history as the website allows users to view account activity for the past three years.

Can I Sign Up?

Any business that is registered to pay taxes in the State of West Virginia is eligible to use *MyTaxes*. However, the State Tax Department is expanding *MyTaxes* based on a schedule that ends in August of 2009. Currently the website is business tax oriented enabling business owners to quickly and easily pay and file their taxes, then get back to business. For a complete list of taxes currently available through *MyTaxes* visit the website.

How Do I Sign Up?

To use *MyTaxes* visit the website at: <https://mytaxes.wvtax.gov>. First time users must register before accessing tax accounts. To register, Taxpayers will need your FEIN (tax identification number) and WV 8 digit account number, the business/legal name and an email address. This is a one time registration process.

MyTaxes Users' Comments:

"Very cool! I registered and it was extremely easy!"

"I especially like having the opportunity to file the Wine Tax online because the state form was so cumbersome. Thank you."

"I file a lot of different returns online, about 50 of them. This one is very user friendly."

Taxpayers select their User ID name and password. Upon registering, *MyTaxes* will email the new user an authorization code for immediate access to the website.

Why Use *MyTaxes*?

West Virginia has a WEB filing application which is different from *MyTaxes*. By the end of 2008, The State Tax Department plans to shut down the existing WEB filing application and convert all online filing and payment activity to *MyTaxes*.

MyTaxes allows users to pay their business taxes by EFT or credit card, schedule a future payment, or submit a return without making a payment. Users can amend returns and even change a return that has already been submitted but has not yet been processed. These are some of the options not available on the WEB filing application.

MyTaxes provides Taxpayers with the flexibility needed to conduct business in West Virginia with ease.
